Adoption, Developer Experience & Business Impact

Separate reporting lens — not part of the operational workflow inventory above.

3	3	5	5
Teams Actively Using N8N	N8N Instances in Use	Individually-Owned Workflows	Unowned Workflows

Team Adoption

Teams actively using N8N	3 (OracleConnectors, Systems Administration, Tools/Compliance Ops)	Deployment automation workflows	2 (4.8%)
		Backup/self-service automation	2
Instances in active use	Restricted, Tools, Unrestricted	Overall monitoring coverage	9.5%
Individually-owned workflows	5		
Unassigned/unowned workflows	5		

Developer Experience

Deployment automation workflows	2 (4.8%)
Backup/self-service automation	2
Overall monitoring coverage	9.5%

Business Impact

Production workflows	9
Production at High criticality	44.4%
Production rated Supportable	55.6%
Production with monitoring	44.4%
Overall inventory Supportable	11.9%

User Engagement (workflow ownership leaderboard)

Ranks each known team/individual by number of workflows they own — a proxy for engagement breadth, since real login/execution activity requires n8n API access not currently available.

Owner	Type	Workflow Count
Tools/Compliance Ops	Team	18
OracleConnectors	Team	9
Shared Automation Mailbox (n8n admin)	Individual/Other	3
Individual: Dan Maiale	Individual/Other	2
Systems Administration	Team	2
Individual: Arun Manglick	Individual/Other	1
Individual: Guru Srinivasan	Individual/Other	1
Individual: Dave Lewis	Individual/Other	1

Adoption Trend Over Time

Tracks how the inventory itself changes across report runs (real workflow-execution trend data requires n8n API/Datadog access not currently available). Each point is one report generation.
